PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience building and modernizing Java/Tomcat enterprise applications in regulated financial-services environments. Develops backend services, REST APIs, secure integrations, and server-side processing while supporting production systems on OpenShift, Kubernetes, Docker, and Linux. Applies performance analysis, bottleneck remediation, root-cause analysis, and controlled enterprise delivery across legacy and modern application environments.

CORE COMPETENCIES

Java & Tomcat Backend Engineering

Enterprise Application Modernization

Financial-Services Technology

Regulated Enterprise Systems

OpenShift & Kubernetes

Performance Analysis

Production Reliability

Cross-Functional Delivery

WORK EXPERIENCE

CITIGROUP

April 2016 - Present

Senior Infrastructure as Code Engineer / Full-Stack Software Engineer

Irving, TX

- Develop Java backend components, APIs, integration services, validation logic, data transformations, and server-side processing for enterprise financial-services infrastructure workflows.
- Serve as a primary engineer modernizing a legacy enterprise load-balancer platform from AngularJS to React while retaining and extending Java/Tomcat backend services for enterprise deployment.
- Enabled efficient processing of 10,000+ infrastructure records through server-side pagination, filtering, improved request processing, reusable services, and efficient data-retrieval patterns.
- Analyze application and infrastructure performance to find bottlenecks affecting data retrieval, request processing, UI rendering, deployment workflows, and system behavior, then implement targeted remediation.
- Build, maintain, and improve CI/CD pipelines for automated build, testing, deployment, and controlled DEV, UAT, and PROD promotion using TeamCity, GitHub, Kubernetes, OpenShift, Harness, and Ansible.
- Diagnose production issues across Java applications, middleware, networking, APIs, certificates, mTLS, authentication, deployment environments, and infrastructure services; perform root-cause analysis and implement corrective and preventive solutions.
- Engineer deployment solutions for restricted enterprise environments, including a static React architecture operating within Tomcat where Node.js installation on production servers is restricted.
- Partner with application developers, infrastructure engineers, security teams, product owners, architects, and technical leadership throughout requirements, architecture, development, testing, deployment, and production support.
- Use AI development tools and advanced prompt engineering for code analysis, development, troubleshooting, testing, documentation, and modernization while maintaining engineering review, security, and quality standards.

PROJECTS

Enterprise Load Balancer Platform Modernization

Modernized a legacy AngularJS/Java enterprise application into a React and Java/Tomcat platform supporting secure workflows, large datasets, CI/CD, and controlled production deployment.

Java, Tomcat, REST, React, OpenShift

VMaaS Architecture Redesign

Contributed architecture and integration designs for direct VM create, update, and delete operations between enterprise infrastructure systems, reducing legacy dependencies and improving maintainability.

System Design, Integration Services, Infrastructure Automation

EDUCATION

Bachelor's Degree - Information Technology / Software Engineering [University of Phoenix](#)

2014

CERTIFICATIONS

CompTIA A+ Certification

[CompTIA](#)

2016

SKILLS

Programming & Backend: Java, SQL, JavaScript, TypeScript, Python, Bash / Shell, Groovy, REST APIs, Object-Oriented Programming, SOLID Principles, Design Patterns

Application Platforms: Tomcat, Red Hat OpenShift, Kubernetes, Docker, Linux, Containerized Development and Deployment

Delivery & Modernization: TeamCity, GitHub, Harness, Ansible, CI/CD, Automated Builds, Deployment Automation, DEV / UAT / PROD Promotion

Security & Reliability: mTLS, Certificates, Authentication, Secure Application Integration, Production Support, Root-Cause Analysis, Performance Engineering
